Boss and Player Combat Parameters

A. Boss progression and control parameters

Boss level	HP (Phase 1)	HP (Phase 2)	Attack cooldown (s)	Stun probability	Stun cooldown (s)
1	1,000	1,200	3.5	45%	4
2	1,200	1,500	2.8	38%	5
3	1,400	1,700	2.0	30%	6
4	1,600	1,900	1.3	18%	7
5	1,800	2,200	0.8	8%	9

Attack cooldown is the interval between boss attacks. A weaker hero results in a longer cooldown.

B. Boss damage and special effects

Boss skill	Effect / damage
Earth Shatter / Shock	400 damage
Spell	350 damage
Falling Swords	0.6 damage per sword
Scream	100 / 200 / 250 / 300 per hit*
Aura Magic	No damage; stops player movement

*Scream damage depends on boss level and the part of the skill that hits.
A single cast may cause multiple hits; damage and hit count are not random.

The boss has no defense.

C. Player configuration and attacks

Player attributes

HP	**4,500**
Level	**4**
ATK	**0 (base damage: 15)**
DEF	**0**
Speed	**5**
Lucky	**0**

Player attacks

- Normal attack: 10–25 damage, depending on the move; increased by ATK.
- Q – Sword Combo: 150 damage per hit, up to 3 hits (450 maximum).
- E – Fireball: 250 damage per cast.
- T – Invulnerability: no damage; grants 2 seconds of invulnerability.

Note: The maximum Sword Combo damage (450) is calculated as 150 damage × 3 hits.
